

SharXS attack! Taking every audience by storm!

The new Maxi SharXS[®]HTI[®] with an extra dose of power.

SEE THE WORLD IN A NEW LIGHT

OSRAM

The super light for superstars.

Maxi SharXS[®]HTI[®] 2000W/D10/60:
higher wattage, proven modular
concept.

A large family with a real bite: OSRAM SharXS[®]HTI[®].

Thanks to their modular design, all the members of the SharXS[®]HTI[®] family are masters of creative light.

More light, more excitement: the new Maxi SharXS[®]HTI[®].

The Maxi SharXS[®]HTI[®] 2000W/D10/60 is a compact double-ended metal halide lamp – the first member of the new high-power Maxi SharXS[®] series with 2,000W. Due to its extra-short arc of 10 mm, this lamp has a very high luminance and provides a high output for intelligent entertainment lighting. Its eXtreme Seal technology enables higher pinch temperatures of up to 450 °C max. Being double-ended (with a pre-focus base), the lamp is suitable for hot restart.

Greater efficiency: short-arc technology.

The SharXS[®]HTI[®] family uses state-of-the-art HTI[®] technology to achieve a particularly high luminous efficacy. The arc in these innovative light sources has been reduced to 3–10 mm. What this means for you is that the SharXS[®] produces

a higher luminance from the same wattage and therefore saves electricity and reduces your operating costs.

Capable thermal loading: eXtreme-Seal technology.

A special coating is the key. The maximum pinch temperature has been increased from 350 °C to 450 °C. Because they can withstand greater thermal loads, SharXS[®] lamps need less cooling and are therefore quieter in operation. Thanks to the higher thermal load capacity of SharXS[®] lamps, less cooling is required so the luminaires are quieter in operation.

Modular design: the same dimensions for all wattages within each SharXS[®] family.

For luminaire manufacturers, the compact modular design means a shorter time to market and lower costs.

The Dutch singer Anouk live in concert, 28.3.2008. Gert Hof was responsible for the Stage & Light design and the lighting equipment was provided by A&O Technology.

SharXS®, Maxi SharXS® and Baby SharXS® stay cool – thanks to eXtreme-Seal technology.

SharXS®HTI® in its element.

SharXS® lamps are at home in all areas of entertainment lighting:

- Shows and events
- Clubs und discotheques
- Concert halls
- TV studios
- Advertising and retail

They are ideal for intelligent luminaires:

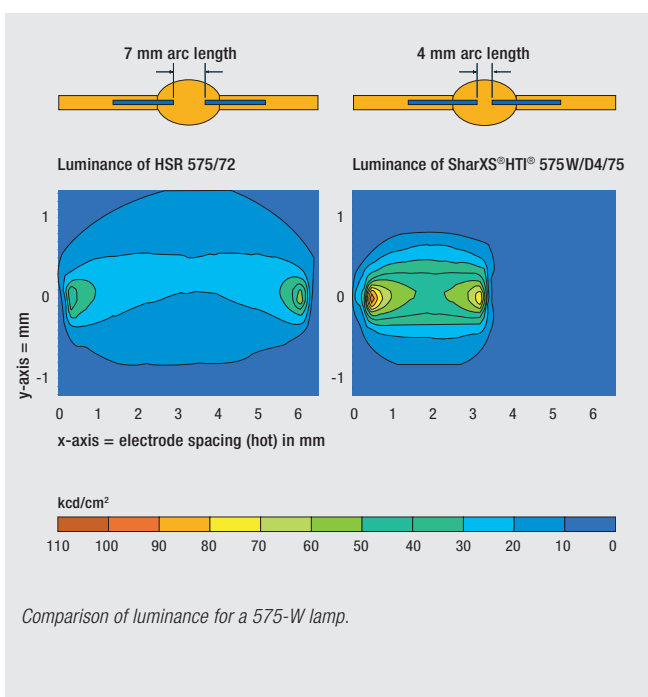

- Moving heads
- Scanners
- Projectors
- Color changers

Successful for the past 30 years.

Double-ended lamps have enjoyed great success on the entertainment market for many years. They really play to their strengths:

- Less sensitive to heat
- Always ready for a hot restart
- Allow more compact luminaire design
- Pre-focus base for accurate lamp installation
- Double-ended lamp will allow for key-lock socket feature

Let your creativity loose. Catch the complete SharXS®HTI® family at your OSRAM dealer or at www.sharxs.com

Rock steady in 93, 136 and 220 mm: SharXS®HTI®.

NEW!

The new Maxi SharXS[®] is here.

- **More power thanks to higher wattage.**
- Short 10-mm arc for greater efficiency.
- eXtreme Seal (XS) technology for improved thermal loading.
- Modular design with overall length of 220 mm.
